PROFESSIONAL SUMMARY

Senior Software Engineer / Senior Frontend Engineer / UI Platform Engineer with 5+ years of experience designing, building, and scaling enterprise-grade front-end platforms, micro-frontend ecosystems, and design systems. Expertise in React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, Micro Frontends, Module Federation, Webpack, Parcel, CI/CD enablement, platform engineering, performance optimization, and Test-Driven Development. Proven experience building enterprise UI platforms, scalable component ecosystems, and revenue-generating products. Proven record of delivering revenue-generating products, leading architecture decisions, mentoring engineers, and driving engineering excellence across distributed teams.

CORE SKILLS

Frontend: React.js • Next.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS

State & Data: Redux • Redux Toolkit • RTK Query • React Query • Context API

Architecture: Micro Frontends • Module Federation • Mono-repo • Design Systems • Component Libraries

Build & Performance: Webpack • Parcel • Vite • Code Splitting • Lazy Loading • Tree Shaking • Bundle Optimization

Testing & Quality: Jest • React Testing Library • TDD • Unit Testing • Integration Testing

Backend & Cloud: Python • Node.js • Express.js • AWS • REST APIs • MySQL

DevOps & Leadership: Git • GitLab CI/CD • System Design • Code Reviews • Mentoring • Agile

PROFESSIONAL EXPERIENCE

Saviynt | Sr. Software Engineer | Bengaluru | Apr 2026 – Present

- Promoted to Senior Software Engineer based on exceptional technical ownership, product impact, and leadership.
- Leading architecture and implementation of scalable micro-frontend platforms for enterprise identity products.
- Driving package bundling optimization using Parcel, Webpack, code splitting, and dependency optimization.
- Improved application performance, bundle size, and developer productivity through build system modernization.
- Configured and optimized GitLab CI/CD workflows for automated builds, testing, and production releases.
- Mentoring engineers, enforcing coding standards, and driving design reviews.

Saviynt | Software Engineer III | Apr 2025 – Mar 2026

- Inventor on a patented data visualization and relationship-mapping framework, leveraging advanced graph visualization techniques to model complex enterprise identity relationships and improve analytical decision-making across large-scale systems.
- Owned architecture for multiple strategic product initiatives and enterprise-scale releases.
- Led cross-team technical execution, architecture reviews, and engineering standardization.
- Implemented TDD using Jest and React Testing Library, significantly improving release reliability.
- Built scalable type-safe front-end applications using React, Redux Toolkit, RTK Query, and TypeScript.
- Led high-impact product initiatives and architecture decisions.

Saviynt | Software Engineer II | Mar 2024 – Mar 2025

- Built flagship products Saviynt IGA 2.0 (Certifications & AAG) from scratch, directly contributing to significant ARR growth.
- Established UI architecture, reusable patterns, and coding standards adopted across teams.
- Defined UI architecture and engineering standards, reducing defects and improving development speed.

- Contributed to enterprise design system development.
- Mentored junior developers and led code reviews.

AarogyaAI | Full Stack Engineer | Bengaluru | Jul 2022 – Feb 2024

- Served as the primary engineering owner with end-to-end accountability for the product lifecycle, independently driving product vision, architecture, development, deployment, and continuous evolution from concept to production.
- Architected and built the complete platform single-handedly across frontend, backend, cloud infrastructure, automation, and internal tooling, establishing the technical foundation for business scalability.
- Partnered directly with executive leadership to translate business strategy, customer requirements, and product vision into scalable technical roadmaps and production-ready features.
- Owned full-stack development using React, Node.js, Express, Python, and MySQL, delivering secure, high-performance, and user-centric applications.
- Designed, deployed, and managed cloud-native infrastructure on AWS including EC2, S3, Lambda, RDS, networking, monitoring, and production operations.
- Implemented enterprise-grade IAM policies, access controls, infrastructure security, and operational governance aligned with security best practices.
- Led compliance initiatives for ISO 27001 and SOC 2 readiness, ensuring secure engineering processes, audit preparedness, and regulatory alignment.
- Built internal productivity platforms, workflow automation systems, and operational tools that improved engineering efficiency and reduced manual overhead.
- Mentored engineers, established coding standards, conducted architecture reviews, and fostered a high-performance engineering culture.

Tata Consultancy Services | Associate Systems Engineer | Ahmedabad | Jul 2021 – Jun 2022

- Managed and supported business-critical enterprise systems, ensuring operational stability, system reliability, and seamless execution of downstream business processes.
- Designed and developed automation scripts using Python to synchronize downstream systems, streamline data propagation, and improve operational efficiency across interconnected platforms.
- Collaborated with cross-functional teams to troubleshoot production issues, optimize system workflows, and implement performance improvements for internal applications.

ACHIEVEMENTS

- **Promotion to Senior Software Engineer at Saviynt** for technical leadership and product ownership
- **Patent + engineering recognitions** (Employee of the Month + Rookie of the Year)

EDUCATION

Bachelor of Engineering | Institute of Infrastructure Technology Research and Management (IIT RAM) | 2017 – 2021 | 8.34 CGPA
