## PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building enterprise applications and products using React and TypeScript. Experienced in frontend architecture, performance optimization, micro-frontends, design systems, and testing. Currently working on enterprise identity products at Saviynt, with experience taking ownership of complex features, improving frontend architecture, and mentoring engineers. Also have experience with full-stack development and AWS from building a platform from the ground up.

---

## CORE SKILLS

**Frontend:** React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

**State & Data:** Redux, Redux Toolkit, RTK Query, React Query, Context API

**Architecture:** Micro Frontends, Module Federation, Monorepo, Design Systems, Component Libraries

**Build & Performance:** Webpack, Parcel, Vite, Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimization

**Testing:** Jest, React Testing Library, TDD, Unit Testing, Integration Testing

**Tools & Practices:** Git, GitLab CI/CD, Code Reviews, Mentoring, Agile/Scrum

**Backend & Cloud:** Node.js, Express.js, Python, MySQL, REST APIs, AWS (EC2, S3, Lambda, RDS)

---

## PROFESSIONAL EXPERIENCE

### Saviynt — Senior Software Engineer

Bengaluru, India | Apr 2026 – Present

- Promoted to Senior Software Engineer and currently responsible for technical decisions and frontend architecture across enterprise identity products.
- Reduced the main application bundle from 1.2 MB to 101 KB and CSS from 71.6 KB to 218 B by restructuring the build, introducing route-based code splitting, removing unused dependencies, and moving to Parcel.
- Reduced direct dependencies from 24 to 4 and removed 4 unused packages as part of the build cleanup.
- Improved CI/CD build time from around 16 minutes to 12 minutes by optimizing GitLab pipelines.
- Mentor 2 junior engineers and regularly review code across the UI team.
- Contribute to coding standards and design discussions to improve consistency across the frontend.

### Saviynt — Software Engineer III

Bengaluru, India | Apr 2025 – Mar 2026

- Co-invented a patented graph-based visualization and clustering framework for helping analysts identify patterns in governance violations and investigate individual records.
- Built the visualization so users could move between graph, list, and filter views without losing their current state.
- Increased test coverage to 85% by introducing and following TDD practices using Jest and React Testing Library.
- Built frontend applications using React, TypeScript, Redux Toolkit, and RTK Query for multiple enterprise identity product releases.
- Participated in architecture reviews and helped improve frontend development standards across teams.

### Saviynt — Software Engineer II

Bengaluru, India | Mar 2024 – Mar 2025

- Worked on Saviynt IGA 2.0 products, including Certifications and Application Access Governance, from the early stages of development.
- Contributed to a product line that generated approximately \$9M in ARR.

- Helped define frontend architecture, reusable component patterns, and coding standards used across teams.
- Contributed to the enterprise design system and reusable UI components.
- Mentored junior developers and participated in regular code reviews.

### **AarogyaAI — Full Stack Engineer**

*Bengaluru, India | Jul 2022 – Feb 2024*

- Joined as the founding engineer and built the platform from the ground up, working across frontend, backend, and cloud infrastructure.
- Developed applications using React, Node.js, Express, Python, and MySQL.
- Designed and managed AWS infrastructure using EC2, S3, Lambda, and RDS.
- Worked directly with multiple organizations and built systems that handled large volumes of data daily.
- Helped grow the engineering team and led a team of 4 developers.
- Worked closely with company leadership to understand customer requirements and turn them into technical solutions and product features.
- Led the initial security assessment and helped address all 6 medium-severity findings within one week as part of ISO 27001 and SOC 2 readiness work.
- Implemented IAM policies and access controls based on security best practices.
- Built internal tools and workflow automation to reduce manual engineering work.

### **Tata Consultancy Services — Associate Systems Engineer**

*Ahmedabad, India | Jul 2021 – Jun 2022*

- Supported enterprise applications and helped maintain the reliability of business-critical systems.
- Built Python scripts to automate synchronization and data movement between downstream systems.
- Worked with cross-functional teams to investigate production issues and improve application performance.

## **ACHIEVEMENTS**

---

- Rookie of the Year, Saviynt (Jan 2025)
- Employee of the Month, Saviynt (May 2024)
- Co-inventor of a patented graph-based data visualization and relationship-mapping framework, Saviynt (2025)

## **EDUCATION**

---

**Bachelor of Engineering** — Institute of Infrastructure Technology Research and Management (IIT RAM) | 2017 – 2021 | CGPA: 8.34
