PROFESSIONAL SUMMARY

Senior Frontend & UI Platform Engineer with 5+ years of experience designing, building, and scaling enterprise-grade front-end platforms, micro-frontend ecosystems, and high-performance web applications. Proven expertise in build system modernization, design systems, and performance optimization. Highly skilled in React, TypeScript, and modern bundlers, with a strong record of driving engineering excellence and mentoring distributed teams.

CORE SKILLS

- **Frontend & UI:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **State & Data Management:** Redux Toolkit, RTK Query, React Query, Context API.
- **Architecture & Design Systems:** Micro Frontends, Module Federation, Monorepos, Component Libraries, UI Platform Design.
- **Build, Tooling & Performance:** Webpack, Parcel, Vite, Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimization.
- **Testing & Quality:** Jest, React Testing Library, Test-Driven Development (TDD), Unit & Integration Testing.
- **Backend & Cloud:** Node.js, Express.js, Python, AWS (EC2, S3, Lambda, RDS), REST APIs, MySQL.
- **DevOps & Workflow:** GitLab CI/CD, Git, Agile/Scrum, Architecture Design Reviews, Engineering Mentorship.

PROFESSIONAL EXPERIENCE

Saviynt

Senior Software Engineer | Apr 2026 – Present

Software Engineer III | Apr 2025 – Mar 2026

Software Engineer II | Mar 2024 – Mar 2025

- **UI Architecture & Micro-Frontends:** Lead the front-end architecture and technical implementation of scalable micro-frontend platforms using Module Federation for enterprise-grade identity governance products.
- **Performance Engineering:** Restructured the core build system and migrated legacy codebases to Parcel/Webpack, successfully **slashing the main application bundle size from 1.2 MB to 101 KB** and optimizing CSS configurations.
- **Build & Pipeline Optimization:** Reduced direct package dependencies from 24 to 4, eliminated redundant modules, and optimized GitLab CI/CD workflows to **cut pipeline execution times by 25%** (from 16 to 12 minutes).
- **Agentic AI Platforms:** Spearheaded front-end development for **Agentic AI Platforms**, building high-performance, asynchronous dashboard layouts capable of real-time monitoring, state tracking, and visualization of autonomous AI agent decision-making matrices.
- **Data-Driven UI & Form Builders:** Engineered highly dynamic, state-driven user interfaces, including complex **Forms and interactive Form Builder platforms** that allow enterprise clients to seamlessly capture and validate large-scale identity compliance data.
- **No-Code AI Orchestration Platforms:** Architected and scaled intuitive user interfaces for **No-Code AI Orchestration Platforms**, enabling non-technical users to visually model, configure, and execute complex automated data workflows without writing code.
- **ARR & Core Product Impact:** Coded flagship product modules (Saviynt IGA 2.0, Certifications, and Application Access Governance) entirely from scratch, contributing directly to a **\$9M+ growth in Annual Recurring Revenue (ARR)**.
- **Testing Excellence (TDD):** Established a rigorous culture of Test-Driven Development using Jest and React Testing Library, successfully **raising component test coverage to 85%** and drastically reducing production regression bugs.

- **Leadership & Code Quality:** Defined enterprise-wide front-end standards and reusable token-based component patterns. Actively mentor junior engineers, conduct deep-dive architecture design reviews, and guide cross-functional UI engineering squads.

AarogyaAI | Full Stack Engineer (Founding Engineer)

Bengaluru, India | Jul 2022 – Feb 2024

- **End-to-End Product Ownership:** Served as the primary engineering owner accountable for the entire product lifecycle; single-handedly architected and coded the platform from concept to production across the frontend, backend, and cloud layers.
- **Full-Stack React Ecosystem:** Built highly secure, performance-oriented UI dashboards using React, backed by Node.js, Express, Python, and MySQL to process heavy data payloads efficiently.
- **Cloud Architecture & Security:** Designed and provisioned scalable, production-ready cloud environments on AWS (EC2, S3, Lambda, RDS) utilizing strict IAM policy compliance and infrastructure security best practices.
- **Compliance & Governance:** Managed initial technical assessment and addressed 6 medium-severity vulnerabilities within a single week, laying down the foundation for ISO 27001 and SOC 2 readiness.
- **Engineering Leadership:** Partnered with executive leadership to map out client requirements into concrete technical roadmaps; scaled out the engineering pod by managing and leading a team of 4 developers.

Tata Consultancy Services | Associate Systems Engineer

Ahmedabad, India | Jul 2021 – Jun 2022

- **System Reliability:** Monitored and optimized business-critical enterprise applications, ensuring continuous operational uptime and performance stability.
- **Automation:** Wrote Python based automation scripts to streamline data synchronization across interconnected downstream platforms, minimizing manual workflows and data mismatches.

ACHIEVEMENTS

- **Saviynt Corporate Awards:** Received *Rookie of the Year* (Jan 2025) and *Employee of the Month* (May 2024) for outstanding technical delivery and leadership.
- **Accelerated Promotion:** Promoted rapidly to Senior Software Engineer at Saviynt due to exceptional product impact and platform ownership.

EDUCATION

Bachelor of Engineering (B.E.) | Institute of Infrastructure Technology Research and Management (IIT RAM)
Graduation Year: 2021 | CGPA: 8.34 / 10
